

*Chassis Parts since 1975*

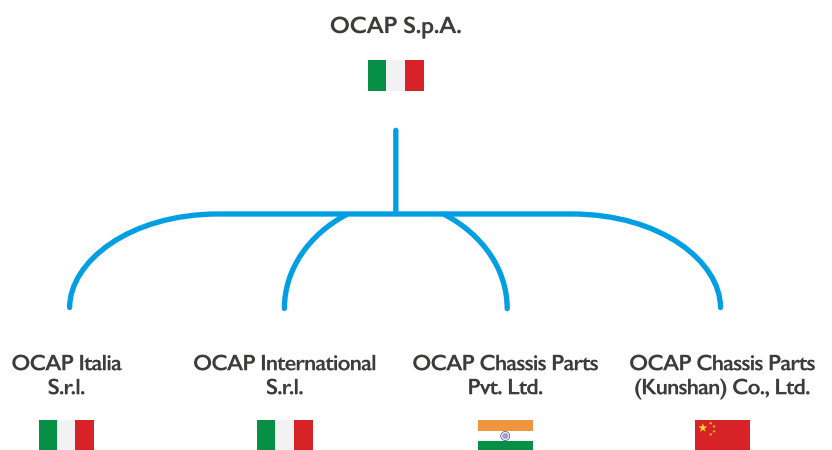

ITALIAN TECHNOLOGY

## COMPANY PROFILE

Since 1975, the OCAP Group has been highly specialized in designing, producing, and selling a wide range of chassis mechanical parts related to [steering, suspension, and braking systems](#), generally applied to vehicles equipped with steering wheels.

**More than 50 years of expertise in chassis parts**

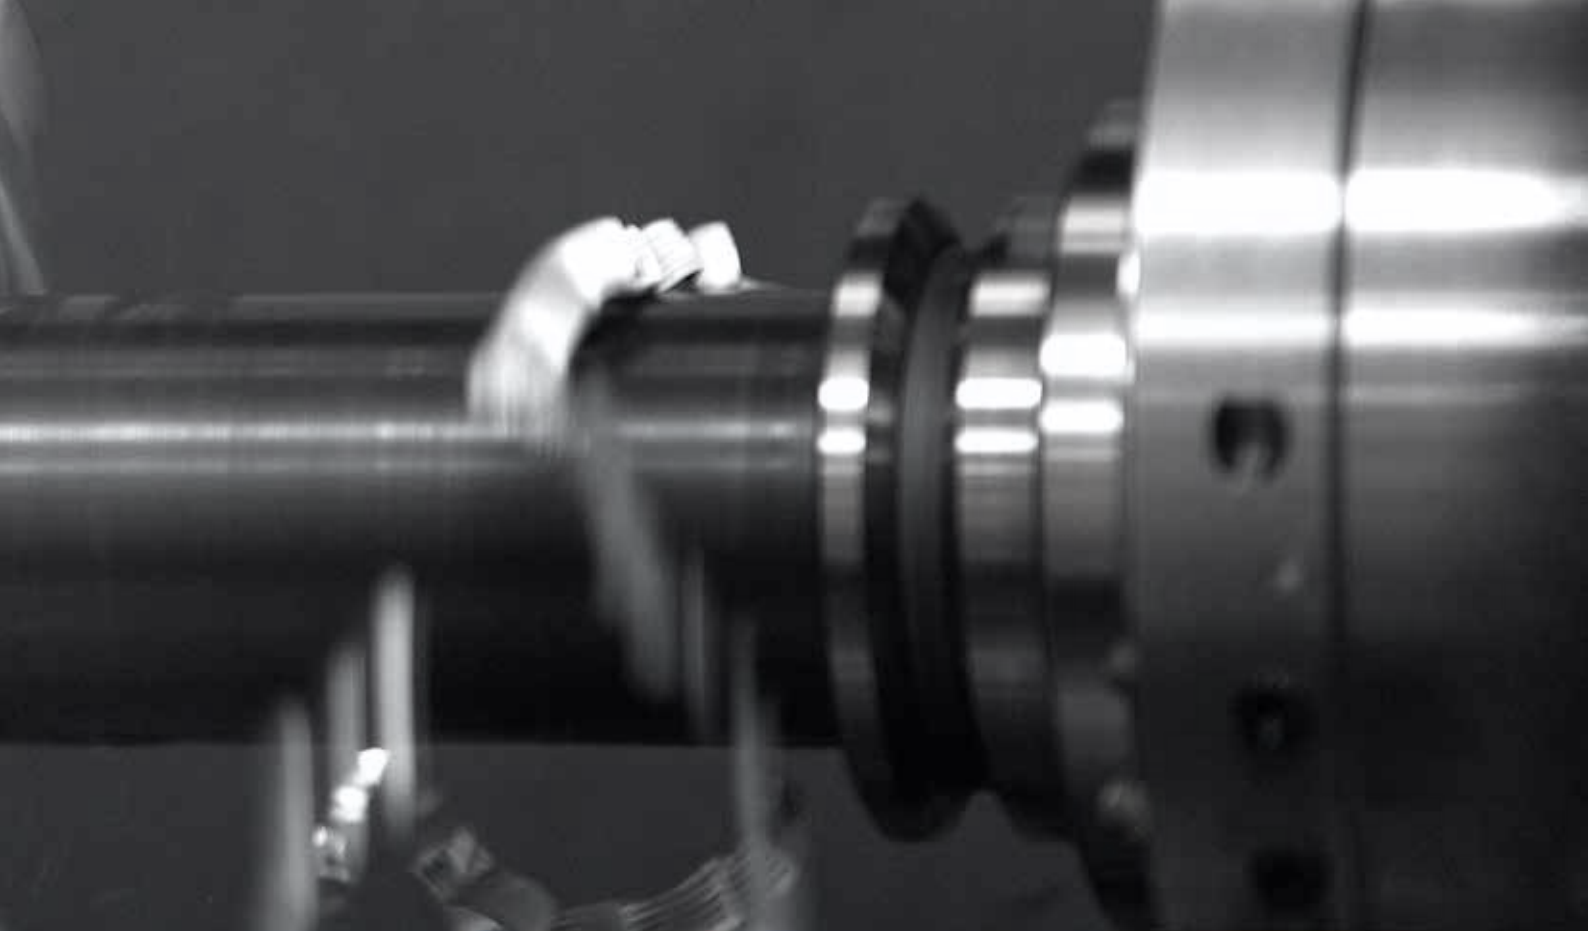

The Holding, OCAP S.p.A., which includes only Direction, Supervision, and Coordination functions, has its [headquarters in Valperga \(Turin\), Italy](#).

OCAP Italia S.r.l. is also located in Valperga. It is the industrial site where the production departments operate three shifts a day, including the [state-of-the-art warehouse, the R&D, Design, Testing, and production units](#).

The impressive [logistics center for After Market distribution](#), OCAP International S.r.l., is based in Oglanico, a few kilometers from Valperga. It is a fully automated warehouse for the storage and distribution of AM products.

OCAP's most recent and [high-tech production units](#) are located in Asia: OCAP Chassis Parts Pvt. Ltd. in Bhiwadi, State of Rajasthan (India) and OCAP Chassis Parts (Kunshan) Co., Ltd. in Kunshan, Province of Jiangsu (China).

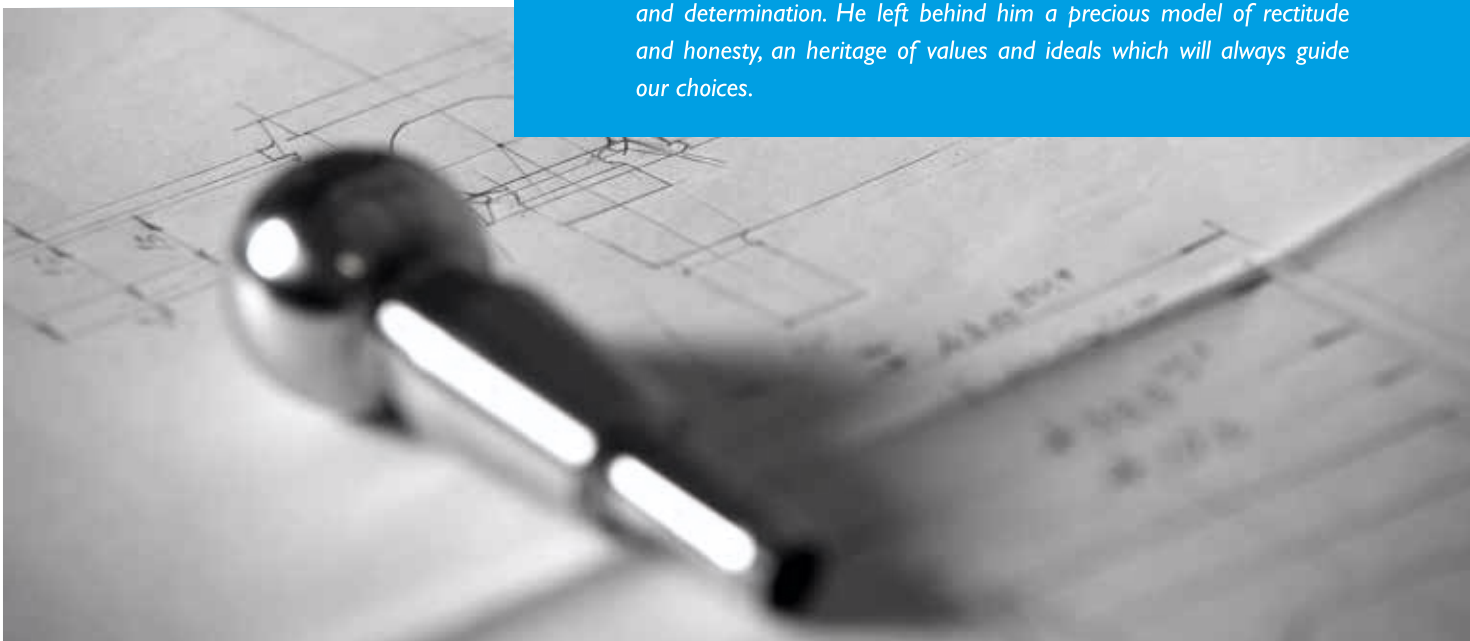

*« Creating value through advanced technologies and innovation in products, processes and services, being a preferential supplier of steering and suspension components for original equipment and aftermarket customers. »*

## MISSION

---

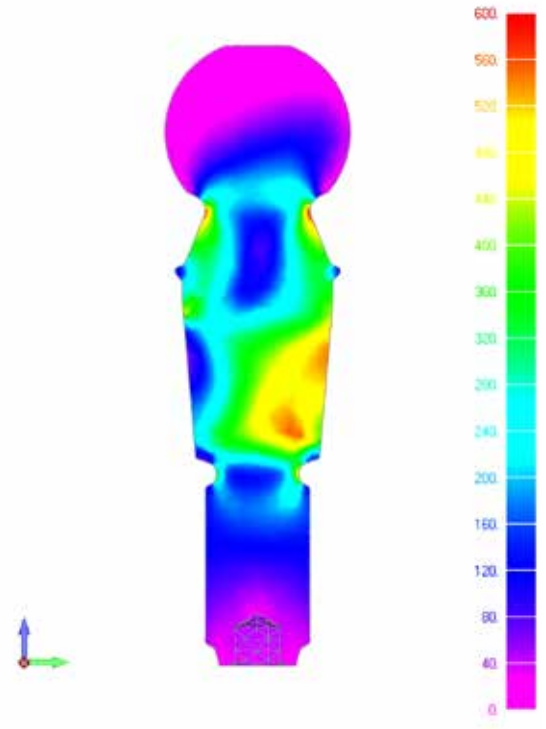

*Sandro Giordano, Knight Order of Merit of the Italian Republic, is the founder of our family's company activity. Being a man of great enterprise, he knew how to realize an important industrial plan with intelligence and determination. He left behind him a precious model of rectitude and honesty, an heritage of values and ideals which will always guide our choices.*

# R&D QUALITY TESTING

Since innovation is one of the main areas of competitive advantage, OCAP constantly strengthens its R&D activities as well as its portfolio of innovative technologies with the aim of reinforcing its position as a **manufacturer of high-technology components**.

Quality is a state of mind at the company: OCAP has met market challenges by achieving **ISO 9001, IATF 16949, and ISO 14001** certifications.

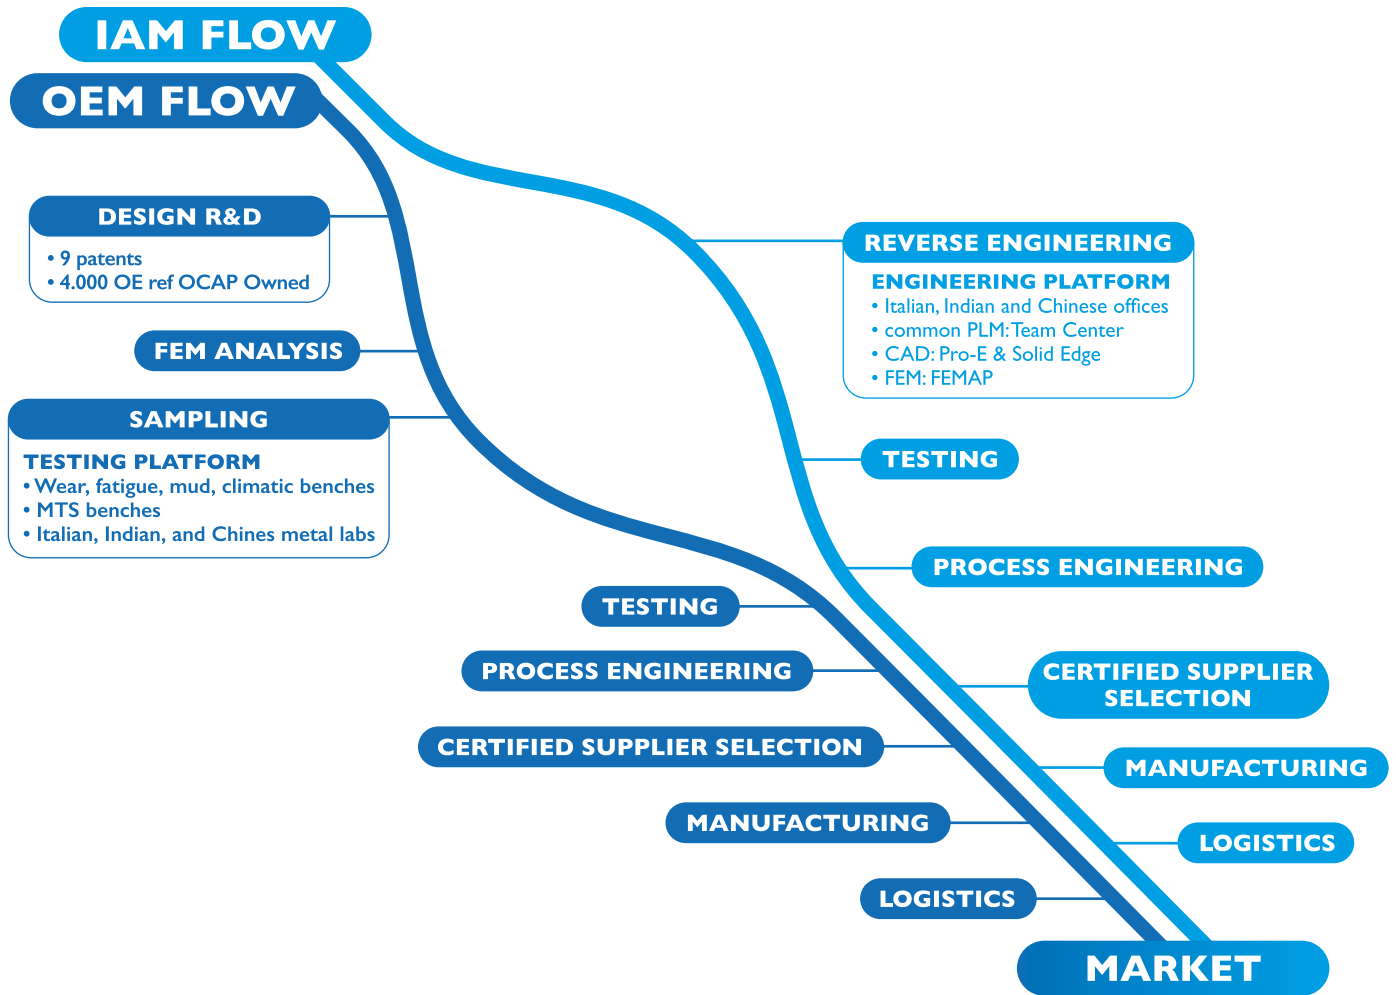

*OCAP products are designed, tested, and manufactured **in accordance with Original Equipment Manufacturer standards***

All new OCAP products can be autonomously tested at the R&D center in Valperga.

Its sophisticated test benches are able to perform fatigue tests and check the complexity of the steering and suspension systems, simulating all road and environmental conditions.

# LOGISTIC

OCAP International is the [logistics center dedicated exclusively to the aftermarket](#). Located in Oglanico (Turin), Italy, it has a strategic position that allows [easy access to the main communication routes](#) with Europe and the rest of the world, by land and by sea, thus ensuring a comprehensive distribution.

The [fully automated warehouse](#) has a capacity of more than 20,000 loading units, used both to stock finished products and goods ready to be shipped.

The smart logistics system has been further improved and completed through groundbreaking material handling.

*Intelligent and self-learning  
management system  
for a quick response*

The replenishment of the warehouse is managed through a sophisticated [Material Requirements Planning \(MRP\) system that ensures optimal stock levels](#) based on historical data and provisional forecasts, aiming to avoid overstocking and understocking.

---

The long experience in the design, testing, and production of components destined for the OE sector allows OCAP to offer **premium quality spare parts** that are either original or of matching quality.

The **OCAP CORNER** includes all the main components related to **steering, suspension, and braking systems**, offering a complete package that ensures maximum installation compatibility, reliability, and road safety.

## **THE CORNER**

*The result of over 50 years of experience in the automotive safety sector, bringing together **expertise and innovation***

**AXIAL JOINT**

**BRAKE DISK**

**BRAKE PAD**

**COMPLETE TIE ROD**

**ENGINE MOUNT**

**REPAIRING KIT**

**SHOCK ABSORBER**

**SHOCK ABSORBER PROTECTION KIT**

**SILENTBLOCK**

**STABILIZER LINK**

**STRUT MOUNT**

**SUSPENSION BALL JOINT**

**TIE ROD END**

**TRACK CONTROL ARMS**

**WHEEL BEARING KIT**

# TRUCK & BUS

The range offered includes parts for major European and Asian makes, and the offer is constantly expanded with the introduction of parts for more recent models to respond to market needs.

OCAP's product range for the truck and bus market is especially focused on steering linkage components. Thanks to OCAP's know-how, production ability, high-quality standards, and flexibility, these components guarantee safety and comfort, regardless of the destination or conditions.

**OEM expertise,**  
*tailored for*  
*Aftermarket excellence*

**DRAG LINK**

**TIE ROD END**

**TORQUE ROD**

**REPAIR KIT**

**STABILIZER LINK**

**TRACK ROD**

**TRIANGULAR TORQUE ROD**

# TRACTOR AND EARTH-MOVING MACHINES

Original Equipment for agricultural and construction machinery has been a cornerstone of OCAP's offerings for more than two decades, [making the company a leader in this sector.](#)

At the heart of OCAP's success is its flagship product, [the OCAP Tie Rod.](#) By leveraging its expertise and cutting-edge technology, OCAP produces and distributes Tie Rods known for their durability, performance, and reliability in demanding agricultural and construction environments.

From tractors to excavators, OCAP covers the complete range of vehicles, ensuring that [customers can find exactly what they need with ease.](#)

**AXIAL JOINT**
