

## OCAP Celebrates 50 Years of Excellence

Valperga, April 2, 2025 – **OCAP** is proud to announce its fiftieth anniversary. This achievement represents a milestone stating the company's strength and innovation capacity in mechanical chassis components.

PRESS RELEASE

Founded in Busano (TO) in 1975, OCAP has established itself as a global reference in the design, production and distribution of mechanical chassis components, both for the Original Equipment (OE), and for the Aftermarket (AM).

*“Reaching this historic milestone is a great source of pride for us”, said Mr. Ivano Giordano, President of OCAP Group. “Since the foundation of this company, 50 years ago, we have constantly invested in research and development, achieving results that have allowed us to grow internationally. The credit goes to all those who have contributed to writing this success story: employees, partners and customers.”*

The company has developed a **global network** starting from its headquarter in Valperga (Italy), thanks to its production hubs in Italy, India and China, where its offer progressively expanded achieving **excellent quality standards**. Half a century of experience allowed OCAP to become a **world leader** in the Off-Road market for steering rods and a supplier of steering linkage components for major international brands in the automotive world—from family cars to luxury sports supercars, as well as light and heavy commercial vehicles and special applications.

*“We look to the future with the same enthusiasm as always,” Mr. Giordano concluded. “Our commitment is to continue innovating, while remaining faithful to the values that*

*have guided us since the very beginning: quality, reliability and focus on customer service.”*
